

## Pre-Calculus Summer Work

I can't tell you how excited I am that you have chosen to take this course next year. I hope you are excited as well and up for the challenge. I will be looking for your full cooperation as we prepare for this course in the fall. I have an assignment packet I would like you to do over the next few months to keep you fresh and ready for my class starting this coming up August.

You are responsible for completing this summer assignment **by the first day of the new school year**. The assignment will be collected and counted as a test grade. In order to receive full credit, complete work must be shown on this work packet or separate piece of paper to justify your answers and graphs must be carefully drawn and labeled.

At this level, doing homework is more than just getting the problems done. The problems should be a learning experience. It is strongly recommended that you do a few problems each day throughout the summer. **Do not leave the entire assignment for the night before school starts.**

If you have any questions, please email me over the summer, [jhuval@stmichaelchs.org](mailto:jhuval@stmichaelchs.org). I highly encourage you to work with other people in the class. If you do not know or remember how to do a problem, use the internet and other students as help. Blank answers will not be accepted. I expect that all parts of the assignment will be completed or at least attempted. If you happen to find a particular problem on the internet, don't copy it. All you are hurting is yourself. Get a hint then continue to try it on your own.

God Bless,

Mr. Huval
